Bull Dog® Tool, Inc.

Bull Dog® Box Tap

The Bull Dog Box Tap is an external catch fishing tool that offers a long, low-angle, internally threaded taper and a wide catch range. The segmented design of the tool provides several distinct advantages over the conventional one-piece box taps.

Features

- The long taper permits the engagement of the fish by more threads. Increasing the contact with the fish results in additional pulling strength.
- The tool is available with a catch range form the maximum available tool I.D. down to 1/2 inch. The wide catch range permits a single tool to cover the range which previously required several tools.
- The tool can be economically repaired with the replacement of only the damaged segments.
- The flexibility of running various combinations of the segments permits designing the tool to have the proper size taper at the bottom of the tool closer to the fish.
- Guide protectors available for short-catch applications.
- Special bottoms available to increase maximum catch.
